Master's in Public Administration

Program Overview

The master program of Public Administration was set up in 1993. The program seeks to qualify its students with theoretical knowledge and applied skills in the fields of public administration by focusing on public policy analysis, human resource development, organizational behavior, and management projects, government performance management, administrative law, public finance and budget preparation, and refining students' skills in the fields of scientific research and community service. The program is taught by qualified faculty members and graduates of the most prestigious international universities, in addition to their qualitative expertise in the fields of management consulting and training provided to public and private sector organizations within the state and outside it.

Since its starting, the program has been revised periodically and develop its study plan, by which the latest of which the most recent of which was in the year 2021, to keep pace with the processes of change in the world and to adjust with the requirements of the Jordanian, Arab, and international labor market, in accordance with the best standards, and after conducting standard comparisons with well-established universities that provide Master of Public Administration and within the local and the world.

Program Objectives

1. Providing students with cutting-edge administrative theories and concepts.
2. Developing the students' capacities in critical thinking and scientific research to solve contemporary administrative problems.
3. Qualifying the student to end up qualified and recognized government employee.
4. Providing scientific and logical solutions to administrative challenges facing the public sector.

Program Importance

The Master of Public Administration program contributes to providing the Jordanian, Arab and international community with professionally and technically qualified scholastic competencies in the fields of public administration and creating a qualitative shift in the level of graduate students that combines their capacities between theory and application.
